WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

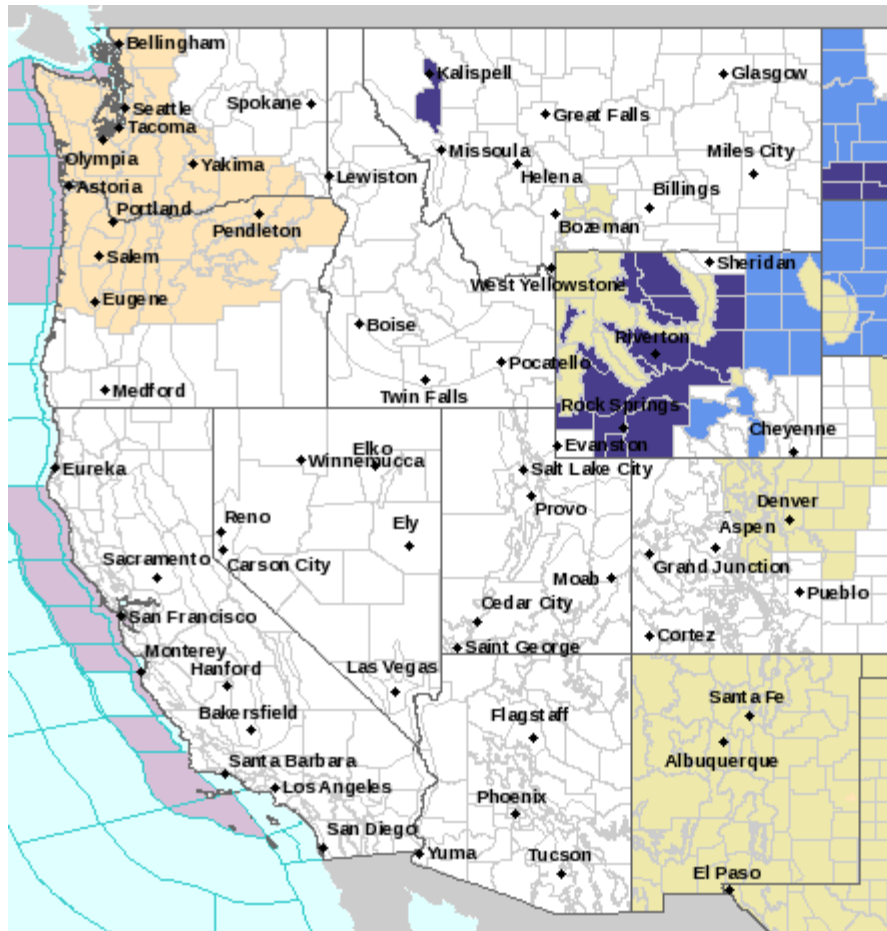

A weak low pressure trough will be moving through the North Ops region today with some cloudiness. The northern half of the region will be cloudier than the south half for the most part. Sunday will be in between weather systems with partly cloudy to sunny skies. No precipitation is expected through Sunday. Monday through Friday a series of small weather systems will affect the Geographic Area. Precipitation is not looking as likely as it has been for our region, and it now appears most of any precipitation coming up next week will fall north of a line from around Cape Mendocino to near Alturas. Showers over the Sierra look most likely Monday night then again late next week. Some gusty south to west winds are expected next week. There will be some increase in winds Sunday afternoon over the Cascade/Sierra crest and eastward, then speeds will increase somewhat Monday with more areas developing rather windy conditions that will continue at least through mid-week. RH will generally be higher overall in all areas next week with rather good overnight RH recovery. Temperatures will be about 10-15 degrees below seasonal normals for the next 7 days with afternoon highs in the warmest inland valleys in the mid 70s (Wed and Thurs) to right around 80, depending on the day. During the coldest days, the snow level could drop to about 7500 ft in our northern areas.

SOUTHERN CALIFORNIA

Temperatures will gradually warm through early next week as a Pacific trough over the West Coast weakens. Maximum temperatures will be in the upper 60s and 70s across the mountains and upper 70s and 80s in the valleys today. The Pacific trough over the West Coast will strengthen bringing significant cooling to the area Wednesday through the end of next week. Minimum humidity will be above 20% away from the deserts and there will be good humidity recovery at night through the end of next week. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas Monday afternoon through the end of next week. There will be northerly winds of 20 to 30 mph with gusts to 50 mph across much of Santa Barbara County and the Grapevine both Thursday night and Friday night. Scattered showers with light rainfall totals will be possible over the Sierra and parts of Southern California Wednesday night through Friday afternoon.
